Dear Hiring Manager,

I am an Angular Developer with 3+ years of professional experience in building scalable, enterprise-grade healthcare applications using Angular, TypeScript, RxJS, and RESTful APIs. I have strong expertise in frontend development and hands-on experience in backend technologies such as Node.js, Express.js, and MongoDB. I have worked across the MEAN stack, developing responsive user interfaces, integrating REST APIs, and building maintainable, high-performance web applications.

At Suvarna Technosoft Pvt Ltd (SoftHealth India Pvt Ltd.), I worked on ABDM healthcare products including ABHA, HFR, HPR, NHCX, and EMR. I have developed reusable Angular components, reactive forms, authentication, route guards, API integrations, and responsive user interfaces using Angular Material, PrimeNG, and Bootstrap.

I am currently looking for an Angular Front-End or MEAN Stack Developer opportunity where I can contribute my technical expertise, build high-quality applications, and continue growing as a software engineer. I am available to join immediately.

Thank you for taking the time to review my application. I would welcome the opportunity to discuss how my experience can contribute to your team. I am available to start immediately and can be reached anytime at the phone number or email below.

Sincerely,

Rakesh Dhobila
