PROFESSIONAL SUMMARY

Angular Frontend Developer and MEAN Stack Developer with 3+ years of experience building enterprise healthcare applications. Hands-on expertise in Angular, TypeScript, RxJS, Reactive Forms, Route Guards, Angular Material, PrimeNG, Bootstrap, REST API integration, and JWT authentication. Primary front-end developer across multiple modules of India's Ayushman Bharat Digital Mission (ABDM), including ABHA, HFR, HPR, NHCX, and EMR. Experienced in developing backend APIs with Node.js, Express.js, MongoDB, and Mongoose and delivering production-ready features in Agile teams.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), RxJS, Reactive Forms, Route Guards, Reusable Components, HTML5, CSS3, SCSS, Responsive Web Design

UI Libraries: Angular Material, PrimeNG, Bootstrap

Backend and Database: Node.js, Express.js, MongoDB, Mongoose, REST API Development

APIs and Security: REST APIs, API Integration, JWT Authentication, FHIR, Swagger, Postman

Tools and Practices: Git, GitHub, CI/CD, VS Code, Code Reviews, Unit Testing, Debugging, Production Deployments

PROFESSIONAL EXPERIENCE

Angular Developer / MEAN Stack Developer

May 2023 - Present

SoftHealth India Pvt. Ltd. | Hyderabad, India | Healthcare IT Company

- Serve as the primary front-end developer for large-scale Angular applications supporting multiple modules of the national Ayushman Bharat Digital Mission (ABDM).
- Develop reusable Angular components, Reactive Forms, Route Guards, and responsive user interfaces using Angular Material, PrimeNG, Bootstrap, HTML5, CSS3, and SCSS.
- Integrate REST APIs and NHCX FHIR-based APIs across Angular and Node.js applications to support reliable front-end and back-end data exchange.
- Build backend APIs with Node.js, Express.js, MongoDB, and Mongoose to deliver application features end to end.
- Implement JWT-based authentication and state-driven UI patterns for secure, maintainable applications.
- Contribute to Agile/Scrum ceremonies, code reviews, debugging, unit testing, and production deployments.
- Collaborate with QA, backend, and business teams to deliver production-ready healthcare applications.

PROJECT EXPERIENCE

ABHA - Ayushman Bharat Health Account (M1, M2, M3) | NHA / ABDM

Role: Angular Front-End Developer

- Delivered three milestone releases (M1, M2, M3) for the ABHA module under the national ABDM initiative.
- Built Angular workflows for health account creation, linking, and management.
- Applied NHA design guidelines to create responsive interfaces across all milestones.
- Contributed to an NHA/ABDM-certified ABHA solution in collaboration with backend and QA teams.

Technologies: Angular, TypeScript, RxJS, Angular Material, Bootstrap, REST APIs

PROJECT EXPERIENCE

HFR and HPR - Health Facility Registry / Health Professional Registry | NHA / ABDM

Role: Angular Front-End Developer

- Developed Health Facility Registry modules for hospital and clinic registration.
- Built Health Professional Registry screens for healthcare professional onboarding.
- Implemented dynamic forms, validation rules, and multi-step workflows using Angular Reactive Forms.

Technologies: Angular, TypeScript, Reactive Forms, Angular Material, REST APIs

NHCX - National Health Claims Exchange | NHA / ABDM

Role: API Integration Developer (Angular, Node.js, MongoDB)

- Integrated NHCX APIs for health insurance claim submission, adjudication, and status tracking within Angular applications.
- Developed Angular and Node.js service layers to process FHIR-based payloads.
- Performed end-to-end testing of claims workflows across multiple insurance payer integrations.

Technologies: Angular, Node.js, Express.js, MongoDB, FHIR, REST APIs

EMR - Electronic Medical Records (Inpatient and Outpatient)

Role: Angular Front-End Developer

- Developed Angular modules for inpatient and outpatient electronic medical record workflows.
- Built features for patient registration, appointment scheduling, clinical notes, prescriptions, and discharge summaries.
- Applied reusable component architecture and Angular best practices to support maintainable applications.

Technologies: Angular, TypeScript, RxJS, Angular Material, PrimeNG, REST APIs

KEY ACHIEVEMENTS

- Contributed to an NHA/ABDM-certified ABHA digital healthcare solution under a national government initiative.
- Delivered Angular functionality across ABDM modules including ABHA, HFR, HPR, NHCX, and EMR.
- Received NSS University-Level Award.
